

Work Experience

Automation Assistant

May 2024 - Jul 2024

[Kibo School](#) | Remote

I developed automated systems to streamline data collection, storage, and visualization for easy access by stakeholders. Utilizing tools like Google Sheets, Airtable, Zapier, Make, and Typeform, I designed workflows that enhanced data accessibility and efficiency across projects.

Software Engineer Intern (Full Stack)

Jul 2023 - Jan 2024

[lhifix](#) | Kaduna State, Nigeria

~ Marnin worked on projects with teams composed of professionals of different skill levels and specializations where we were constantly coming up with ideas for projects ideas to test out.

~ I consistently delivered on 100% of my assigned project ensuring I properly engage with my team members to build appealing and easy-to-use front-ends while gaining experience building backend safe and performant backends with NodeJS and Postgres.

~ I successfully built two front-end milestone projects where I have had to carefully utilize my software development and team management skills to bring the project to life.

Frontend Developer

Jun 2023 - Sep 2023

[Enoverlab](#) | Remote

Built 2 MVPs in 6 months the first was a platform that houses and showcases multiple restaurants giving users a plethora to choose from and quickly make a reservation and the second was an MVP targeted at reducing the problem of unemployment in Nigeria.
