EDUCATION

Air Force Institute of Technology Kaduna
Bachelor's, Computer Science

April 2021 - October 2024
GPA: 4.4

PROFESSIONAL EXPERIENCE

Whatbytes

Software Developer

Remote

January 2025 - Present

- Spearheads rapid prototyping of customer-facing features using React, Next.js, and Tailwind CSS, reducing page load times by 35% and boosting user engagement.
- Builds and maintains scalable design systems using React, Tailwind, and reusable UI patterns to ensure consistency across enterprise-grade projects. Utilizes React Query, Zustand, and Zod to provide a predictable and maintainable frontend architecture, collaborating with backend teams to integrate robust APIs and optimize code efficiency, contributing to a 20% increase in application responsiveness and a 30% improvement in Core Web Vital scores.
- Utilizes AI agents and AI-powered tools such as GitHub Copilot and Cursor to enhance code quality and reduce development time. Collaborates with UI/UX designers and backend engineers to deliver pixel-perfect, accessible web solutions.
- Works within an agile development environment, actively participating in sprint planning, standups, and code reviews to streamline workflows across the SDLC.
- Streamlines CI/CD processes by automating GCP server management, reducing deployment times by 90% and improving development efficiency.
- Implements and deploys RESTful APIs using Python/FastAPI.

Whatbytes

Engineering Intern

Remote

November 2024 - January 2025

- Refactored legacy React codebases using modern patterns and tools such as Vite and Tailwind CSS, contributing to the development of robust, responsive web applications from Figma designs using Next.js with server-side rendering to improve load times and SEO.
- Translated Figma designs into pixel-perfect, responsive components with strong attention to detail and a focus on problem-solving.
- Built and integrated new product features into existing applications while ensuring consistent quality assurance.

Kibo Inc.

Automation Assistant

Remote

May 2024 - July 2024

- Designed automated workflows using Google Sheets, Airtable, Zapier, and Typeform, reducing manual processing time by 50% and enabling faster decision-making and more agile product iterations.
- Configured end-to-end integrations to improve data accessibility, reducing data retrieval times and providing actionable insights for ongoing product improvements.

Ihifx Technologies

Software Engineer Intern (Full Stack)

Kaduna State, Nigeria

July 2023 - January 2024

- Developed responsive web applications with HTML, Next.js, TypeScript, and Tailwind CSS that improved system performance by 60%, validating new product ideas through customer testing.
- Refactored outdated React codebases using modern tools (Vite, Tailwind CSS), cutting bug occurrences by 40% and accelerating development cycles to rapidly prototype and release new features ensuring compliance with user requirements
- Translated Figma designs into scalable UI components that increased user satisfaction, supporting iterative product ideation and customer validation.

EnoverLabs

Frontend Developer

Nigeria

March 2023 - May 2023

- Collaborated with a multi-disciplinary team to launch an MVP in just 3 months—reducing time-to-market by 30% and validating product concepts with early customer feedback
- Developed reusable UI components that increased user satisfaction by 20% and streamlined frontend development, allowing for faster prototyping of new ideas.

PROJECTS

TechLead

Abuja, FC, Nigeria

Frontend Developer

September 2024 - October 2024

- Designed and built a production-ready e-learning website using Next.js and shadcn/ui, delivering a modern, intuitive learning experience
- Translated product requirements into a responsive, accessible user interface, focusing on performance, scalability, and a clean component architecture.

Skysec Global Services

Lagos, Nigeria

Frontend Developer

October 2023 - Present

- Led the frontend development of the company website, building a scalable e-commerce experience with integrated inventory management using Next.js
- Leveraged TanStack Query for efficient server-state handling, Zustand for client-side state management, and shadcn/ui to deliver a clean, accessible user interface.

Investorfyre

Remote

Frontend Software Developer

December 2024 - August 2025

- Road responsible for developing the frontend architecture using Next.js with a unique data access layer for improved security, integrating RESTful backend features, and optimizing data fetching with TanStack Query
- Implemented global and local state management with Zustand to support complex user interactions and ensure a responsive user experience.

NexDiscovery

Remote

FullStack Developer

November 2024 - Present

- Designs, builds, and deploys a production-ready full-stack application, owning UI development, backend services, and database integration.
- Designs, builds, and deploys a production-ready full-stack application, owning UI development, backend services, and database integration.
